

MISSION BRIEF (Development)

Take your protein pills and put your helmet on! Our mission begins by clearly defining your objectives, messaging and visual style. We then assemble the right team and a detailed timeline for your project.

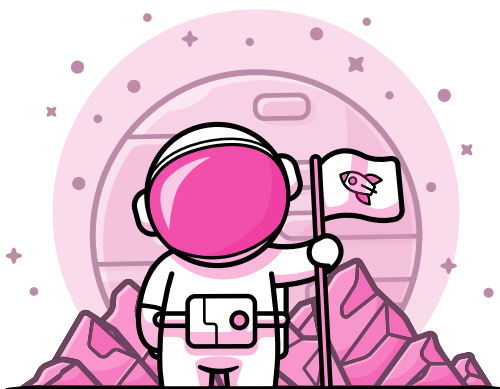

BLAST OFF (Pre-Production)

Buckle up! Our copywriters now put together an engaging and influential script with visual beats and references. Once we're all in alignment, our creative team develops a detailed storyboard. Your project is already taking shape before you.

WARP SPEED (Production)

Are those stars in your eyes? Pedal to the metal! This is where the magic really happens. We film, animate, and photograph all elements of your story (and make sure we all have fun doing it). We stay on target and stick to the script.

HAPPY LANDING (Post-Production)

Houston we have touchdown! With all the media assets captured, our hands-on post production team crafts your final videos for delivery. The story is fine tuned in the edit, music added and all requested formats are delivered bang on time.
